Package list

- Zigbee Repeater x1
- User Manual x1

Product Description

The Wireless ZigBee Repeater is a functional device that assists ZigBee gateways and devices to expand their signal coverage.

Preparation to use

- 1 Your phone is connected to Wi-Fi.
Make sure your phone and gateway are on the same Wi-Fi network to ensure an effective connection between your phone and the gateway.
- 2 Download and open the app.
Search the Store for "Smart Life" or download and install the app by scanning the 2D code on the outer packaging /user manual.

For the first download, please click on the "Register" button to register your account, or if you already have an account, click on the "Login" button.

How to connect to Network

- After the device is plugged into the power adapter, press the button for 5 seconds, confirm that the light flashes;
- Open the Smart Life App, on the Smart Gateway page, click Add sub-devices,
- Follow the page guidelines to connect your device to the internet, and once you've added it, you'll find it in the "My Home" list.

PS. The repeater must be used with a Tuya gateway that supports the zigbee protocol.
